1.Uvod

U ovoj dokumentaciji je detaljno pisano o korišćenim programskim jezicima, markup jezicima, funkcionalnosti sajta, mapi sajta, opisu funkcionalnosti sa priloženim slikama I na kraju o kodovima.

1.1 Korišćeni programski I markup jezici

- HTML
- CSS
- JavaScript
- jQuery
- PHP

1.2 Opis funkcionalnosti

Sajt se sastoji od jedne index strane na kojoj se nalaze sve ostale stranice sajta I predstavljaju jednu logičku celinu koja je isprogramirana od strane javascripta I jquery-ija i php-a. Takodje postoji I loading strana pri učitavanju koja je bitan deo UX dizajna koji sam želeo da postignem stvarajući korisnicima efekat stvaranja čitavog sajta dajući im vremena za razmišljanje o tome šta prvo da analiziraju kada se sajt učitava.

Ilustracije sam sve radio sam u Adobe Illustrator programu sa grafičkom tablom koja je takođe bitan deo prvenstveno UI/UX dizajna a potom I zbog responsive dizajna pa na kraju I zbog SEO optimizacije. Animacije sam radio u Adobe Animate CC 2018 I importovao kao canvas. Logo je takodje kreiran u Illustratoru. Kada se konačno dodje do index strane posle loading faze dolazi se do dela sajta koji je dostupan neautorizovanim korisnicima. Registracijom I logovanjem korisnik postaje autorizovan I povećava mu se obim funkcionalnosti koje može da koristi. Takodje ako je korisnik admin redirektuje se na admin stranu

na kojoj se sadržaj prilagođen admin timu. Na index strani se pojavljuje meni koji je isprogramiram sa dodatnim funkcionalnostima preko jQueryja. Klikom na link iz menija se dolazi do ostalih stranica sajta.

Responsive nisam stigao da uradim za sve uređaje stoga se izvinjavam ako na nekim mestima se nešto raspadne, obecavam da ću završiti sve kako treba.

1.3 Template

Template nije korišćen, već je čitav kod napisan samostalno.

2.1 Organizaciona šema

Index strana je strana u kojoj se nalaze sve ostale stranice, osim admin strane koja je posebna php strana.

2.2 Mapa sajta

```
<?xml version="1.0" encoding="UTF-8"?>

<urlset
xmlns="http://www.sitemaps.org/schemas/sitemap/0
.9">

    <url>

    <loc>http://www.book-store.iz.rs/</loc>
```

```

    <lastmod>2019-03-13</lastmod>
<changefreq>daily</changefreq>
<priority>1</priority>

</url>

</urlset>

```

2.3 DIZAJN BAZE

3 Kodovi

3.1 Index.php

```
<?php

include "config/connection.php";

session_start();

if(isset($_POST['btnLogins'])){

    $username=$_POST["nameLogin"];

    $pass=md5($_POST["passLogin"]);

    $upit="SELECT k.id,k.email,k.username,k.ime,k.prezime,u.naziv,k.idUloga
FROM korisnici k INNER JOIN uloge u ON k.idUloga=u.id WHERE k.username=:username
AND k.pass=:pass";

    $stmt=$konekcija->prepare($upit);

    $stmt->bindParam(":username",$username);

    $stmt->bindParam(":pass",$pass);

    $stmt->execute();

    $user=$stmt->fetch();

    if($user){

        $_SESSION["user_name"] = $user->ime;

        $_SESSION['user']=$user;

        if($user->idUloga == 1){

            header("Location: admin.php");

        } else {
```

```
        header("Location: index.php");
    }
}

}

if(isset($_POST['logout'])){
    session_start();
    unset($_SESSION['user']);
    header("Location:index.php");
}

?>

<h1>our mission</h1>

<p>BOOKING-STORE is a design-minded, multi-disciplinary brand offering booking products, see events, and experiences related to city library. We are based in the San Francisco Bay Area.</p>

<p>

We regularly host author events and book signings, weekly story times, and four monthly book clubs. Booking-store provides complimentary gift wrap and gift cards are available for that hard to select for reader. Booking-store a bookfair provides over 20 bookfairs annually working with each school to create the perfect celebration of books and literature while supporting school fundraising goals.</p>

<h2>address</h2>

<p>Bond Street [lower level, inside C'H'C'M']</p>

<i class="fas fa-clock"></i>

<div id="aboutDes" class="aboutUs">

<h1>about designer</h1>

<p>My name is Vasilije Vasilijevic and I'm coming from Serbia. I'm a web developer and also a student of Internet technologies at High ICT Belgrade. My goal when it's about business is to present fullfilled project based on deep analyze and abstract solutions which give me a picture of designing user interface and user experience properly for users and connecting all backend stuffs needed for business existence.</p>

<h2>project mission</h2>

<p>Idea of this project was to improve faster solution for using offers of city library and to ensure easier managing and storing data needed for bussiness. Also, the main goal was to save up client's time to book online which gives more time to librarian to organize and prepare product for client. This is ongoing project and it's present view is not the finnaly. Client can become a member by registrating online and pay online for year membership or can become a

member at our store and librarian will give him login credentials. Librarian will have a desktop application written in C# to track data and events by users and based on that to execute business requirements. Also, it might have a possibility for API, to join delivery company for clients that don't want to go to store to take their books.</p>
